

# The Big Project Planning Document

---

Who are your target users?

What benefit would they gain by using your app?

Name/briefly describe the app's screens (three or more required)

- 1.
- 2.
- 3.

What Material Components for the Web components will you use?

What data API endpoints will your app be using? (two or more required)

What visualization will be included in your app? (Google Maps, Google Chart, d3.js, etc.)

What data will you store in and retrieve from the IndexedDB?

What device interaction(s) will your app utilize? (one or more required)

What app shell assets will your app's Service Worker cache?

---

## Events

What are the key events, objects and actions in your app? (Sample content below. This page is for you to think through some of the issues *before* you start coding.)

event	object	actions
<i>load</i>	<i>page</i>	
<i>click</i>	<i>nav button: &lt;name&gt;</i>	<i>show screen &lt;name&gt;</i>
<i>Response from &lt;data source&gt; received</i>		

---

## Unknowns

What don't you know that you need to know?

---

## Schedule

How will you have a product to deliver on the deadline date?

What are the milestones in your development of the project?

Week of	Decisions and/or deliverables
March 3	
March 10	
March 17	
March 24	
March 31	
April 7	
April 14	
April 21	April 26 - Product Delivery
